Profile

Dynamic and detail-oriented React Native developer with a solid understanding of the MERN (MongoDB, Express.js, React.js, Node.js) stack. Passionate about creating efficient and scalable mobile applications with a focus on user experience. Proven ability to deliver high-quality projects within tight deadlines.

Projects

- **Studynotion** - This is full stack mern app in which you can login or signup both instructor and student. As instructor you can post your paid video lectures. As student you can purchase these courses
- **Music player** – This is react native android app in which you can access all audio files from your device and can play them, you can create your own favorite and custom lists
- **Doc viewer** – This app is used to access all document files(pdf, docx, xlsx) you can read these files and can search words
- **Food Delivery system**- This consists of three React-native apps: Restaurant, Customer, and Delivery Man app. As an owner, you can post your food items and can track your earnings. To buy food customers can buy from any kitchen with various payment options. Delivery Man can deliver any order from the pending order list which he wants to deliver using map direction and also track his earnings.
- **FileManager**– This is for android device by which you can access files and folders of device and you can perform various operations of files like copy, move, delete, compress, extract etc
